PROFESSIONAL SUMMARY

Informatics Technician student at Instituto El Obraje and **Incoming Information Systems Engineering student at UTN (2027)**. Experienced in technical problem-solving, hardware maintenance, and systems support. Proven leadership skills through community management and independent tech projects, with a focus on efficiency and continuous learning.

EDUCATION

Instituto Privado El Obraje | *Alta Gracia, Córdoba* **Informatics Technician** | Mar. 2020 – Dec. 2026

- **Software Development:** Programmed dynamic web applications using Python and JavaScript, integrating databases and functional interface design.
- **Operating Systems:** Advanced administration and configuration of Windows and Linux environments, optimizing security and performance.
- **Hardware Infrastructure:** Comprehensive diagnosis, assembly, and preventive/corrective maintenance of computer equipment and peripherals.
- **Networking:** Implementation of LAN/WLAN networks, including router configuration and data communication protocols.
- **Entrepreneurship:** Managed end-to-end systems projects, from requirements gathering to final product delivery.

National Technological University (UTN) | *Córdoba, Argentina*

B.S. in Information Systems Engineering | *Expected Start: 2027*

EXPERIENCE

EduLideres | *Community Manager* Dec. 2025 – Feb. 2026

- **Social Media Management:** Increased platform interaction by 35% through strategic content execution.
 - **Growth Strategy:** Implemented advertising campaigns resulting in a 20% increase in reach.
 - **Performance Analysis:** Monitored metrics and trends to optimize campaigns and ensure brand relevance.
 - **Community Leadership:** Supervised online communities, resolved conflicts, and coordinated events to improve participation.
-

TECHNICAL SKILLS

- **Development & Cloud:** Python, JavaScript, Microsoft 365 (Azure AD), Google Workspace.

- **Systems & Virtualization:** Windows 11/Pro, Linux (Ubuntu, Debian), macOS, VMware, VirtualBox, Docker.
 - **Networking & Security:** TCP/IP protocols, VPN, Firewalls, Antivirus, and Backup management.
 - **Maintenance:** Hardware diagnosis, peripheral repair, and preventive maintenance.
-

SOFT SKILLS

- **Leadership & Troubleshooting:** Analytical capacity to identify root causes and lead technical solutions under pressure.
- **Effective Communication:** Translating complex technical concepts for non-technical users with empathy and patience.
- **Time Management:** Ability to prioritize tasks and tickets based on business impact and urgency.
- **Adaptability:** High capacity for fast learning and integration into new technological environments.
